

Message from Editorial Desk

25th September 2026

Dear Readers, Researchers, and Contributors,

It is a pleasure to welcome you to the September 2026 issue of the *International Journal of Engineering Research and Sustainable Technologies (IJERST)*.

Research and innovation continue to reshape the way we understand technology, engineering, sustainability, and their role in addressing the complex challenges of contemporary society. In this rapidly evolving environment, scholarly journals have an important responsibility—not only to provide a platform for new ideas, but also to encourage rigorous inquiry, meaningful discussion, and the responsible application of knowledge.

The present issue brings together research contributions reflecting the breadth and diversity of contemporary engineering and technology studies. The articles address different areas of inquiry while sharing a common objective: to contribute knowledge that can support further research, practical innovation, and sustainable development. We hope that these contributions will stimulate discussion among researchers and encourage further investigation in their respective fields.

At IJERST, we remain committed to strengthening the quality and integrity of the peer-review and publication process. We believe that constructive peer review, transparent editorial practices, responsible authorship, and adherence to ethical standards are essential foundations of credible scholarly communication. The continued confidence of authors, reviewers, editors, and readers is therefore central to the growth of the journal.

We are particularly grateful to the researchers who continue to contribute their work to the journal and to the reviewers who generously devote their time and expertise to evaluating submitted manuscripts. Their collective efforts enable us to maintain an academic environment in which research can be communicated with clarity, responsibility, and scholarly purpose.

As engineering and technology increasingly intersect with sustainability, data, artificial intelligence, emerging technologies, and societal needs, opportunities for interdisciplinary research are expanding. We encourage researchers, academicians, professionals, and emerging scholars to explore these intersections and share research that can contribute meaningfully to both academic knowledge and real-world applications.

We look forward to continuing this journey together and to building a vibrant scholarly community committed to research excellence, innovation, sustainability, and the advancement of knowledge.
Thank you for your continued interest and support for IJERST.

Warm regards,

On behalf of Editorial Team

Dr.V.RameshBabu
